RICARDO
MUTUBERRIA

BIO

Ricardo Mutuberría is a biologist (Basque Country University, Spain - University of Cincinnati, Ohio) with an MSc in Applied Biotechnology and Microbiology (Wolverhampton University, UK) and an MSc in Science Communication (Pompeu Fabra University, Barcelona). Ricardo moved from biomedical research laboratories to science museums to promote public engagement of science and scientific culture. In 2006 he joined Parque de las Ciencias, a science center in Granada, Spain, as to work in the development and management of their new Health Sciences Pavilion¹. In 2010 he moved back to Barcelona to join the audiovisual production company Nueve Ojos as Head of Scientific Content for the development of multimedia exhibits for Planet Life², the permanent exhibition at Museu Blau, the Barcelona Natural Sciences Museum. In 2011

Ricardo was hired by the American Museum of Natural History as Assistant Director of Global Business Development³, a position that exposed him to best practices at AMNH and museums and cultural institutions all around the globe. In 2013 Ricardo joined Genspace, a molecular biology laboratory open to the public in Brooklyn, as a volunteer mentor and teacher, and in 2015 he was appointed Director of External Programs, with the objective of helping science centers develop and operate community laboratories in their premises. Since 2016 Ricardo works from Barcelona in the development and programming of open science labs, exhibition development, traveling exhibition sales and touring, organization of science events and anything that has to do with the joy of learning and practicing science.
